Self-made Projects

2024

My Portfolio Page

A personal portfolio website which shows professional projects and skills. Implemented a modern, user-friendly interface to facilitate navigation and highlight achievements.

2024

SaaS Landing Page

The landing page was developed for a SaaS product, which showcases the implementation of responsive design and interactive UI elements to improve user engagement.

2024

Olympics Data Analysis

Analyzed historical Olympics data to uncover trends and insights in medal distributions by country and sport. Utilized data visualization to present findings in an accessible format.

2024

E-commerce Platform

Developed an e-commerce platform using the Payload E-Commerce Template with Next.js, integrating features like Stripe payment processing, role-based access control, dynamic layout builder, and SEO optimizations to support digital and physical product sales. Leveraged TypeScript for scalable, type-safe code.

2024

AI Image Generator

Implemented an AI-powered image generation tool allowing users to create unique images based on user inputs, utilizing advanced image processing techniques.

2023

Weather App

Built a real-time weather application displaying current weather conditions using data from a public API. Features a good user experience through location-based weather updates.
